# COLOUR AND CONTRAST FOR INCLUSIVE DESIGN

#### **OVERVIEW**

- INTRODUCTION TO AKZONOBEL
- SEMINAR OBJECTIVES
- IMPORTANCE OF GOOD DESIGN AND ADEQUATE VISUAL CONTRAST
- PROJECT RAINBOW, THE EQUALITY ACT AND BUILDINGS REGULATIONS
- ACHIEVING INCLUSIVE DESIGN WITH COLOUR AND CONTRAST
- SUMMARY

# Introduction to Akzonobel

# AkzoNobe

# We've been setting the standard in colour and protection for more than 200 years

#### 1926

Sikkens paint business started in the Netherlands

1792

#### Enka from the

Netherlands and Germany's VGF merged and became part of Dutch holding company AKU

#### 1969

AKU and KZO merged to form Akzo

#### 1994

Nobel Industries was acquired by Akzo to create Akzo Nobel. Four years later, the company also acquired Courtaulds in the UK, which owned the International brand

#### 2017-2019

AkzoNobel made several acquisitions, including Xylazel in Spain; the UK's Flexcrete Technologies Ltd; Colourland Paints in Malaysia; and Mapaero in France

#### 2020-2022

Completed series of acquisitions, including Titan Paints in Spain, New Nautical Coatings in the US and Grupo Orbis in Latin America

#### 1646

Bofors Forge -Alfred Nobel owned munitions factory

1855

The Holzapfel brothers set up their **International** business to sell marine antifouling paint

#### 1953

1967

Koninklijke Zwanenburg Organon merged with Koninklijke Zout Ketjen and Koninklijke Nederlandse Zoutindustrie and acquired Sikkens, forming Koninklijke Zout Organon (KZO)

#### 2016

2008 AkzoNobel acquired BASF's
AkzoNobel Industrial acquired Coatings ICI business

AkzoNobel sold its Specialty Chemicals business to The Carlyle Group and GIC The company delivered on its 15 by 20 ambition and launched a new Grow & Deliver strategy AkzoNobel sustainability pyramid

People. Planet. Paint.

# **AkzoNobel**

Our products and brands make it possible for us to live up to our People. Planet. Paint. sustainability approach.

They're each making crucial contributions to our sustainability ambitions through all the layers of this pyramid.

#### Our key sustainability themes

Climate change | Circularity | Health and well-being

#### Our key sustainability ambitions by 2030

**50%** less carbon emissions in our own operations and across value chain\*

100% circular waste in own operations

driven by reduce, reuse, renew

50% of revenue from sustainable solutions

>100,000 members of local communities empowered with new skills

#### Our six sustainability drivers

Health and well-being

Reduce, reuse and renew

People and communities

Longer-lasting performance

Our high quality and world class brands, executing our sustainability strategy

# **Progress towards our ambitions**

**50%** 

less carbon emissions in our own operations\*

FY2022 2030 ambitions

**50%** 

of revenue from sustainable solutions

40%

28%

50%

50%

100% circular use of materials in own operations driven by reduce, reuse, recycle

56%

100%

100,000+

members of local communities empowered with new skills

38,087

100,000+

\* Absolute reduction, baseline 2018.

## **SEMINAR OBJECTIVES**

• IMPACT OF VISUAL IMPAIRMENT ON NAVIGATION

EQUALITY ACT PART M: COLOUR & CONTRAST

INCLUSIVE DESIGN: USING COLOUR CONTRAST WITHOUT IMPACTING ON AESTHETICS

# **Visual Impairment**

#### IMPORTANCE OF SIGHT

70-75% OF INFORMATION IS GATHERED THROUGH VISION

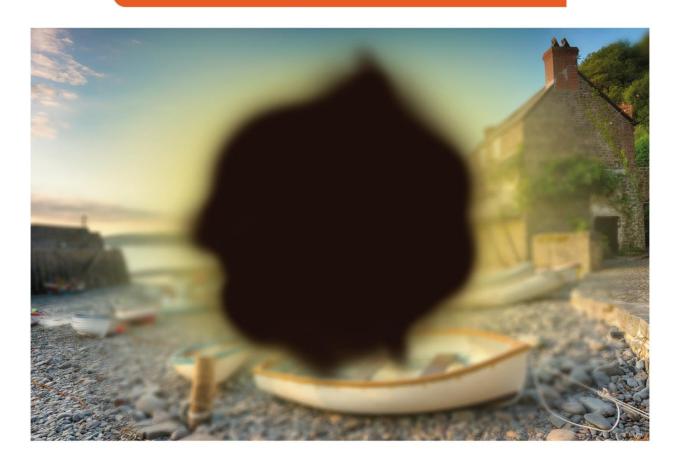

**DIFFERENT EYE DISEASES = DIFFERENT TYPES OF RESIDUAL VISION** 

UNDERSTANDING VISUAL IMPAIRMENT LEADS TO MORE INCLUSIVE DESIGN

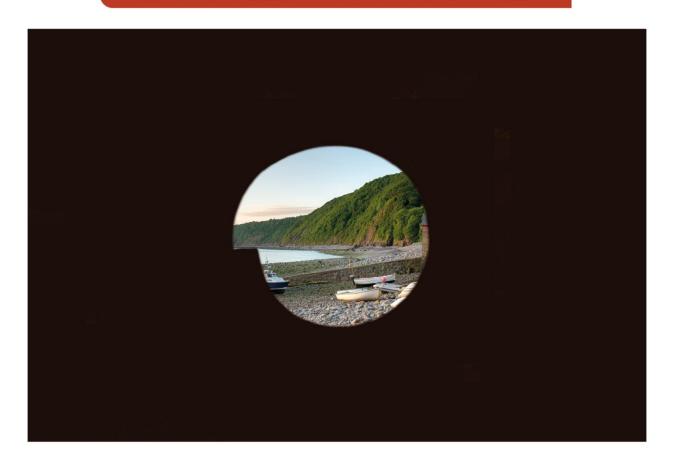

# **GOOD VISION**

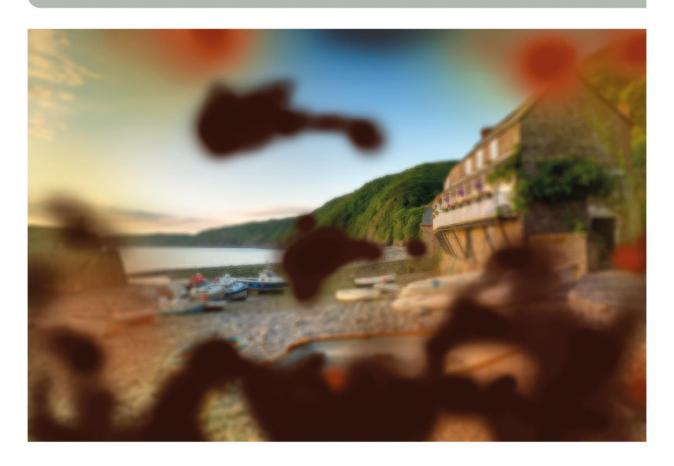

# LOSS OF CENTRAL VISUAL FIELD

# LOSS OF PERIPHERAL FIELD VISION

# GENERAL/SPORADIC LOSS OF VISUAL FIELD

# VISUAL CONTRAST AIDS NAVIGATION

People with Visual Impairments Use their Residual Vision to Find their Way Around

Relying on Contrast and Colour Changes to Distinguish Between Surfaces and Objects

1.2m

2m

#### **COLOUR AND CONTRAST IN DESIGN**

An Obvious Response might be to
Simply Maximise Colour and
Luminance Contrast Between
Surfaces and Fixtures

# Project Rainbow & Using Colour Contrast

#### PROJECT RAINBOW

#### **PROJECT RAINBOW RESEARCH 1997**

ICI PAINTS, RNIB, UNIVERSITY OF READING AND GUIDE DOGS FOR THE BLIND

#### **ESTABLISHED HOW COLOUR CAN:**

- ENHANCE SPATIAL AWARENESS
- IDENTIFY KEY BUILDING FEATURES
- WITHOUT COMPROMISING ON AESTHETIC APPEAL

#### **KEY CONCLUSION:**

 USE OF SUFFICIENTLY DIFFERENTIATED COLOURS ON CRITICAL ADJACENT SURFACES SUPPORTS WAY-FINDING

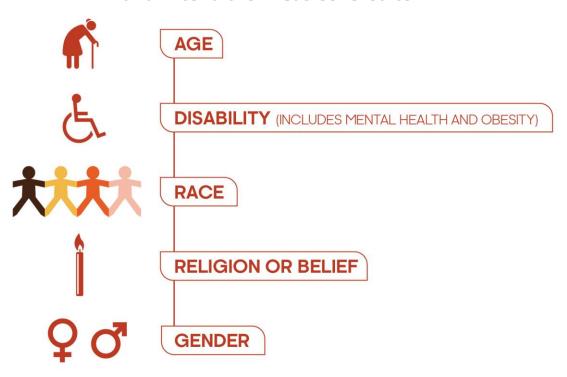

## **EQUALITY ACT 2010**

The Purpose of the Act is to Streamline and Combine Previous Anti-Discrimination Legislation and Extend the Areas Covered to:

#### **EQUALITY ACT DESIGN GUIDELINES**

#### PROJECT RAINBOW LED TO THE DEVELOPMENT OF VISUAL CONTRAST DESIGN GUIDANCE IDENTIFIED IN:

#### **BUILDING REGULATIONS APPROVED DOCUMENT PART M, VOL 2**

For New Build and Major Refurbishment Projects
Minimal Visual Contrast of 30 LRV
Between Critical Surfaces is Recommended

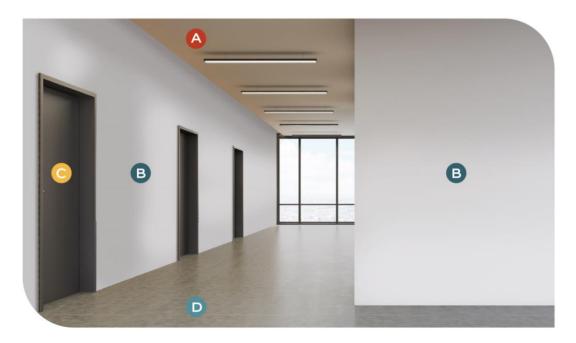

BS 8300-2:2018 Design of an accessible and inclusive built environment - Buildings. Code of practice

Best Practice Guidelines for All Buildings Minimal Visual Contrast of 20 LRV However 30 is Preferred

### CRITICAL SURFACES

#### MOST IMPORTANT SURFACES FOR UNDERSTANDING INTERIOR LAYOUTS - NEED TO BE SUFFICIENTLY DIFFERENTIATED FOR EASY IDENTIFICATION

# TRIM

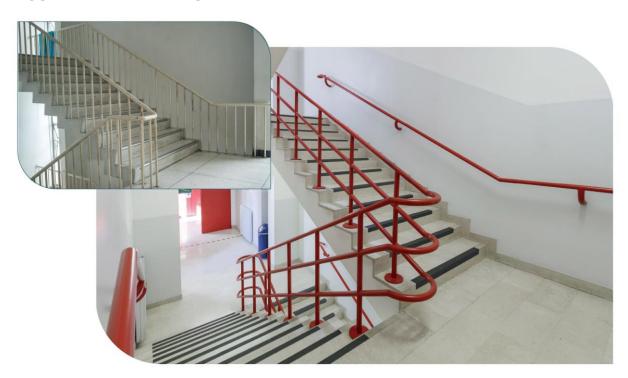

#### **TRIM INCLUDES:**

- 1 coving
- 2 SKIRTING
- **3** ARCHITRAVE
- 4 DADOS

## SPECIAL FEATURES HIGHLIGHTED

#### HIGHLIGHTING SPECIAL FEATURES ALLOWS THE BUILDING TO BE USED MORE EFFECTIVELY

#### BY VISUALLY IMPAIRED PEOPLE

# **GENERAL OBSTACLES AND FURNITURE**

Minimize Obstructions
Differentiate Between Walls and Floors

Strong Contrast Needed for Features that Extend Beyond Base Supports

# BAD PRACTICE

# GOOD PRACTICE

## LIGHTING

# VISUAL CONTRAST CAN BE REDUCED BY INEFFECTIVE LIGHTING DESIGN

Interior Lighting Conditions which Produce Glare and Shadows Create an Environment which can be Uncomfortable for those with Visual Impairments

**ILLUMINANCE (LUX)** 

**General Minimum: 100 LUX** 

# **NATURAL LIGHTING**

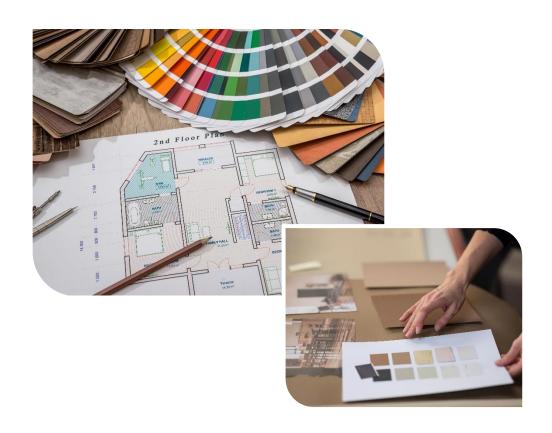

Natural Light is a Good Source of Illumination, but it can Cause Shadows which Make the Environment Difficult for Partially Sighted People to Use Independently

# **Creating Your Colour Scheme**

#### **CREATING YOUR SCHEME**

- Colour should be integral to project don't leave until the end
- Gather lots of information
- Talk about personal needs & preferences with individuals
- Think about texture, finish and colour
- As well as durability and usability

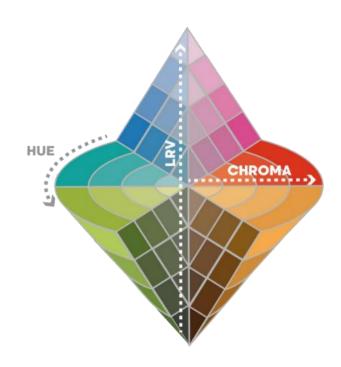

#### **HOW THE EYE PERCEIVES COLOUR**

# COLOUR, AS PERCIEVED BY THE AVERAGE EYE, IS TRI-DIMENSIONAL:

- Hue
- Light Reflectance Value (LRV\*)
- Chroma

\*LRV Difference Defines Visual Contrast as Referenced in the Equality Act Guidelines and in BS 8300-2:2018

#### **COLOUR NOTATION SYSTEMS**

# THERE ARE MANY COLOUR NOTATION SYSTEMS USED GLOBALLY

The Role of the Notation System is to Give Each Colour a Clear, Unique Identity and to Aid Colour Scheming

A Good Notation System will Reflect How the Eyes See Colour

#### **EXAMPLE OF A NOTATION SYSTEM**

#### COLOUR PALETTE NOTATION REFLECTS THE THREE DIMENSIONS OF COLOUR:

#### **SELECTING COLOURS: THREE SIMPLE SCHEME TYPES:**

#### **TONAL SCHEMES:**

DIFFERENT DEPTHS OF THE SAME HUE FAMILY

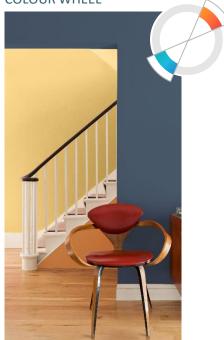

#### **HARMONISING SCHEMES:**

COLOURS FROM NEIGHBOURING HUES

#### **CONTRASTING SCHEMES:**

COLOURS OPPOSITE ON THE COLOUR WHEEL

## **COLOUR PROPORTION & FLOW**

#### • CONSIDER THE PROPORTIONS OF COLOUR

# **Summary**

## SUMMARY

- VISUAL IMPAIRMENTS AND NAVIGATING WITH RESIDUAL VISION
- IMPORTANCE OF VISUAL CONTRAST AND CRITICAL SURFACES
- LIGHTING CONSIDERATIONS
- EQUALITY ACT GUIDELINES
- INCLUSIVE DESIGN: PRACTICAL & AESTHETIC
