Pack size

1L, 2.5L, 5L

Application Method

Application: Brush or roller only. For Health and Safety reason related to all solvent-based paints, spray application is not recommended. STIR THOROUGHLY BEFORE USE. The normal finishing process is 2 full coats of Dulux Trade Satinwood. However, where a strong colour change is required, then a coat of an appropriate coloured Dulux Trade Undercoat may be necessary. Whilst leading-edge technology has been used in the development of this product, the nature of white solvent-based paints means that they will all discolour over time. The rate of discolouration is faster on areas with no or low natural or UV light. For long-lasting whiteness, we recommend the use of a water-based formulation such as Dulux Trade Quick Dry Satinwood.
