

Cuprinol Garden Shades Tinting Base

LEMON SLICE

About this product

Add beautiful colours to your garden with Cuprinol Garden Shades, which has been specially developed to colour, protect and weatherproof sheds, fences, garden furniture and other garden wood for upto 6 years. Its special pigments ensure a richer colour and allow the natural texture of the woodgrain to shine through. It can also be applied on terracotta, brick and stone. Colours are easy to choose b

y combining nature's neutrals (greys, and muted greens, browns and blues) which are best suited for bigger items in the garden and nature's brights (yellows, pinks, purples and brigther greens and blues) ideal for smaller items in the garden. Just have a go! Not to be applied on decking.

Product Information

Typical Use

Read the health, Safety and Environment information opposite. Bare or untreated wood should be pre-treated with an appropriate wood preserver to prevent rot and decay. Surfaces should be dry and free from dirt and algae etc. Remove any algae, lichen, fungi or moss using an appropriate fungicidal wash or cleaner designed for the job. Wood that has been wood stained, painted or varnished should be stripped back to bare wood and treated as bare wood.
