### Product Information

#### Typical Use

To get the best results with Cuprinol Cladding & Fence Opaque Finish, make sure surfaces to be treated

are sound, clean and dry (new surfaces particularly must be fully dry). Professional users: see Cuprinol Datasheet CT678 for full information before use, available free on request by telephoning 0333 222 70 70 or visiting <http://www.duluxtradepaintexpert.co.uk>

**Composition**

Solvent-based

**Key Benefits**

Protects and decorates, Easy application, Solvent based

**Pack size**

10L

## Application Method

Normally there is no need to stir Cuprinol Cladding & Fence Opaque Finish before use but any seperated liquid on the surface should be stirred gently. Do not thin. Two coats of Cuprinol Cladding & Fence Opaque Finish will normally be required to produce a completely opaque finish. Allow the first coat to dry before applying the second.

Cold, humid conditions will slow drying and may affect the final appearance and durability.
